

OneRain Incorporated – Job Description

Title: Software Developer
Reports to: General Manager
Location: Longmont, Colorado
Job Type: Full-time, Salaried Position
Hiring Range: \$70,000 - \$90,000

Job Summary

Our growing team is seeking to add a colleague who will participate in general software development with a focus on providing our production systems the dedicated professionalism required for our customers to succeed. We are looking for a full stack developer with some AWS experience. This person will be participating in maintaining the code base, as well as developing new features or applications for the efficient, successful production of high-quality data and analytics that are then used for projects of vital importance, including regulatory compliance, flood management, forensic and legal processes, and other high value applications related to water management.

Duties and Responsibilities:

- Enhance existing software tools and build new ones to improve our products
- Manage and process environmental data to produce high quality datasets
- Explore and develop new methodologies and processes to improve data collection, visualization and analytics capabilities
- Collaborate with AEM partner companies to develop and support new data collection and transmission solutions
- Support and deploy servers on Amazon Web Services (AWS)
- Develop and support embedded Linux systems
- Document features and functions of our software and data services
- Test our software and its functionality
- Clearly and regularly communicate with management and technical support personnel
- Manage bug reporting, tracking and resolution
- Be a secondary contact for customers with data questions and issues
- Become a technical expert in software to help support sales team efforts
- Participate in on-call rotation to support our production systems

Knowledge, Skills and Abilities:

- Able to see the big picture and takes responsibility for pursuing the details necessary to create the larger desired outcome
- Skilled at creating solutions that address industry and customer issues effectively and cost-efficiently
- Solves problems by breaking down larger problems into manageable pieces
- Has strong written and verbal skills
- Communicates technical concepts effectively, with both technical and non-technical people
- Is willing and able to work with existing code
- Is open to learn new approaches, computer languages and technologies.
- Is a very strong team member and works well independently, as needed
- Must be able to sit at a desk for long periods of time. Work may involve bending, stooping, kneeling, reaching, and climbing stairs. Occasional lifting of up to 20 lbs. may be required

Credentials and Experience:

- Degree in computer science, engineering, science or related environmental field with demonstrable practical coding experience
